USACE Logistics Activity – Readiness XXI Logistics Response Support

Jim McKinney,
ULA
Chief, Logistics Plans & Operations Division

US Army Corps
of Engineers®

Agenda

- Concept of Operations
- Key Mission Areas
- Organizational Structure
- Staff Responsibilities
- Logistics Planning and Response Team
- Logistics Support Team
- Requesting Support

US Army Corps of Engineers®

Concept of Operations

- USACE Logistics Activity Provides:
  - One central point for current logistics operations
  - Deployed logistics services for civil and contingency operations
  - Single point of contact (24/7) for local, regional, and strategic logistics planning and operations requirements

901-874-5832

US Army Corps of Engineers®

Key Mission Areas

- Service provided to USACE responders:
  - Reception, Staging, Onward movement, and Integration (RSO&I)
  - Transportation services such as travel, fleet vehicle management, and freight shipping
  - Logistics element of ESF#3 Support Teams
  - Supply and property management/accountability
  - Maintenance management
  - Technical oversight of life-support contract (LOGCAP)

US Army Corps of Engineers®

Staff Responsibilities: Logistics Operations Center

- Personnel assigned to the LOC will:
  - Serve as integrator for planning and operations across Regional boundaries
  - Provide programmatic management and oversight of national and strategic planning for logistics operations
  - Provide management control of logistics response operations and teams
  - Coordinate long-term planning goals and objectives with ULA functional divisions, Divisions, and HQUSACE

US Army Corps of Engineers®

Staff Responsibilities: Regional Logistics Planners

- Personnel assigned in direct support of Regions/MSC will:
  - Be physically located at the supported MSC HQ
  - Serve as the MSC logistics planner and prime POC for civil and military missions
  - Coordinate with other Regional Logistics Planners, ULA, local USACE COCOM LNO, and supported districts

US Army Corps of Engineers®

Staff Responsibilities : LPOD Contingency Planning

- Personnel assigned to the Transatlantic Programs Center will focus principally on:
  - Providing oversight and management of the logistics Field Force Engineering program
  - Providing direct coordination with TAC EOC, USACE Deployment Center, and National Capitol Region
  - Coordinating with regional logistics planners and division military planners on all issues related to contingency deployment and FFE/military support planning
  - Preparing to serve as alternate LOC

US Army Corps of Engineers®

Staff Responsibilities: HQUSACE Liaison

- Personnel assigned to HQUSACE will:
  - Provide direct coordination with USACE G-3, Homeland Security Office, and Directorate of Logistics
  - Coordinate with FEMA, DOD, Army and other federal partners
  - Represent ULA at senior-level briefings, exercises, etc.

US Army Corps of Engineers®

Logistics Planning and Response Teams (Civil Emergency Missions)

- Currently 5 standing teams (all volunteer)
- 5 trained and certified logisticians per team
- “Plug and play” log element of the ESF#3 Support Team
- Additional 60 plus logisticians ULA members & Retired Annuitants available as augmentation
- Civil/CONUS LOGCAP available, $1.2 million per event, 3 base events per year, with options
- Developing OCONUS LOGCAP capabilities

US Army Corps of Engineers®

Logistics Support Teams (Contingency Missions)

- 8 LST have been identified
- 34 logisticians are FFE trained and certified
- Developing a LOGCAP capability to provide OCONUS augmentation and support services as needed

US Army Corps of Engineers®

Requesting Support (All Hazards)

- First 24-36 hours is local support provided by LDP
- Request for ULA augmentation (LPRT/LST/SME) submitted from district/MSC to UOC
- ULA receives/fills tasker
- Teams/SME begin movement within 6 hours and arrive on-site in between 24-36 hours

US Army Corps of Engineers®

Key Decision Points

Phase	Task
Pre land fall Actions (D-7)L-168 to L-96)	ULA Logistics Planning and Operations Division placed on alert
	Impacted district request Logistics support. LDP identifies abilities with in house staff. Request additional logistics support
	LDP Coordinate creation of taskers by district EM for LPRT, notifies RLL and LPOD.
	Projecting logistics requirements based on event predictions
Pre land fall Deployment (L-96 to L)	LPOD notifies LPRT of mission. LPRT deploys to impacted district sets up RSO&I
	Establish RSO&I and Support Services for incoming PRTs
	Continue to evaluate requirements and make

US Army Corps of Engineers®

Key Decision Points

Phase	Task
Post land fall Response (L-0 to L-14)	
	LPOD evaluates the impact predictions
	Recommends activation of LOGCAP, request funds for logistics
	Funds received, activates LOGCAP contract
	Coordinate deployment of LOGCAP personnel
	Continue evaluation of Logistics requirements and make recommendations on staffing
Recovery (L-14 Until Complete)	Deploy and operate RSO&I and Support Svc's at RFO and other assets as necessary
	Return home station of LPRT, LOGCAP performing RSO&I and life support processes with ULA oversight
	Continue evaluation of Logistics requirements
